

Building a strong, stable platform.

2022 Third Quarter Results

November 7, 2022

TSX: CG NYSE: CGAU

Caution Regarding Forward Looking Information

Information contained in this document which is not a statement of historical fact, and the documents incorporated by reference herein, may be “forward-looking information” for the purposes of Canadian securities laws and within the meaning of the United States Private Securities Litigation Reform Act of 1995. Such forward-looking information involves risks, uncertainties and other factors that could cause actual results, performance, prospects and opportunities to differ materially from those expressed or implied by such forward-looking information. The words “believe”, “expect”, “anticipate”, “contemplate”, “plan”, “intends”, “continue”, “budget”, “estimate”, “may”, “will”, “schedule”, “understand” and similar expressions identify forward-looking information. These forward-looking statements relate to, among other things: statements regarding 2022 Outlook, including production, costs, capital expenditures, depreciation, depletion and amortization expenses and taxes; the effects of inflation on the Company’s costs; the weakening of the Canadian dollar and Turkish lira relative to the U.S. dollar; expectations regarding copper credits and copper prices in the fourth quarter of 2022; the expected trend of the Company’s performance toward achieving guidance; expected cash outflows at the Öksüt Mine for the fourth quarter of 2022; completion of mercury abatement, containment and safety work in the gold room of the ADR plant at the Öksüt Mine, including construction progress; the expected restart of gold room operations, related regulatory approvals and the expected timing thereof; the capacity of the Öksüt Mine’s ADR plant to process inventories of loaded gold in carbon ; preparation and timing of further submissions relating to the EIA amendment for the Öksüt Mine and further discussions and regulatory review thereof; progress on ordinary course permitting at the Öksüt Mine and the ability to mine the Keltepe and Guneytepe pits; expectations for continued mining, crushing and stacking operations at the Öksüt Mine in the fourth quarter of 2022; highlights of a new life of mine plan for the Mount Milligan Mine, including reserves and resources, costs, inflationary pressures and expectations regarding the release of further guidance; expectations for optimization of Mount Milligan Mine’s staged flotation reactors; strategic options for the Molybdenum BU, including a potential restart of the Thompson Creek Mine, net cash required to maintain the business and expectations for molybdenum prices; expectations for ongoing activities at the Goldfield project, including drilling, resource estimation and a feasibility study; expectations for market purchases under a normal course issuer bid; possible impact to operations relating to COVID-19; leadership transition of the Chief Executive Officer position; and expectations regarding contingent payments to be received from the sale of Greenstone Partnership.

Forward-looking information is necessarily based upon a number of estimates and assumptions that, while considered reasonable by Centerra, are inherently subject to significant technical, political, business, economic and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking information. Factors and assumptions that could cause actual results or events to differ materially from current expectations include, among other things: (A) strategic, legal, planning and other risks, including: political risks associated with the Company’s operations in Türkiye, the USA and Canada, including potential uncertainty created by upcoming presidential elections in Türkiye and their potential to disrupt or delay Turkish bureaucratic processes and decision making, including potential uncertainty created by upcoming presidential elections in Türkiye and their potential to disrupt or delay Turkish bureaucratic processes and decision making; resource nationalism including the management of external stakeholder expectations; the impact of changes in, or to the more aggressive enforcement of, laws, regulations and government practices, including unjustified civil or criminal action against the Company, its affiliates, or its current or former employees; risks that community activism may result in increased contributory demands or business interruptions; the risks related to outstanding litigation affecting the Company; risks of actions taken by the Kyrgyz Republic, or any of its instrumentalities, in connection with the Company’s prior ownership of the Kumtor Mine or the Global Arrangement Agreement; including unjustified civil or criminal action against the Company, its affiliates, or its current or former employees; the impact of constitutional changes or political events or elections in Türkiye; risks that Turkish regulators pursue aggressive enforcement of the Öksüt Mine’s current EIA and permits or that the Company experiences delay or disruption in its applications for new or amended EIA or other permits; the impact of any sanctions imposed by Canada, the United States or other jurisdictions against various Russian and Turkish individuals and entities; potential defects of title in the Company’s properties that are not known as of the date hereof; the inability of the Company and its subsidiaries to enforce their legal rights in certain circumstances; risks related to anti-corruption legislation; Centerra not being able to replace mineral reserves; Indigenous claims and consultative issues relating to the Company’s properties which are in proximity to Indigenous communities; and potential risks related to kidnapping or acts of terrorism; (B) risks relating to financial matters, including: sensitivity of the Company’s business to the volatility of gold, copper and other mineral prices; the use of provisionally-priced sales contracts for production at the Mount Milligan Mine; reliance on a few key customers for the gold-copper concentrate at the Mount Milligan Mine; use of commodity derivatives; the imprecision of the Company’s mineral reserves and resources estimates and the assumptions they rely on; the accuracy of the Company’s production and cost estimates; the impact of restrictive covenants in the Company’s credit facilities which may, among other things, restrict the Company from pursuing certain business activities or making distributions from its subsidiaries; changes to tax regimes; the Company’s ability to obtain future financing; the impact of global financial conditions; the impact of currency fluctuations; the effect of market conditions on the Company’s short-term investments; the Company’s ability to make payments, including any payments of principal and interest on the Company’s debt facilities, which depends on the cash flow of its subsidiaries; and (C) risks related to operational matters and geotechnical issues and the Company’s continued ability to successfully manage such matters, including the stability of the pit walls at the Company’s operations; the integrity of tailings storage facilities and the management thereof, including as to stability, compliance with laws, regulations, licenses and permits, controlling seepages and storage of water where applicable; the risk of having sufficient water to continue operations at the Mount Milligan Mine and achieve expected mill throughput; changes to, or delays in the Company’s supply chain and transportation routes, including cessation or disruption in rail and shipping networks whether caused by decisions of third-party providers or force majeure events (including, but not limited to, flooding, wildfires, COVID-19, or other global events such as wars); the success of the Company’s future exploration and development activities, including the financial and political risks inherent in carrying out exploration activities; inherent risks associated with the use of sodium cyanide in the mining operations; the adequacy of the Company’s insurance to mitigate operational and corporate risks; mechanical breakdowns; the occurrence of any labour unrest or disturbance and the ability of the Company to successfully renegotiate collective agreements when required; the risk that Centerra’s workforce and operations may be exposed to widespread epidemic including, but not limited to, the COVID-19 pandemic; seismic activity; wildfires; long lead-times required for equipment and supplies given the remote location of some of the Company’s operating properties and disruptions caused by global events and disruptions caused by global events; reliance on a limited number of suppliers for certain consumables, equipment and components; the ability of the Company to address physical and transition risks from climate change and sufficiently manage stakeholder expectations on climate-related issues; the Company’s ability to accurately predict decommissioning and reclamation costs; the Company’s ability to attract and retain qualified personnel; competition for mineral acquisition opportunities; risks associated with the conduct of joint ventures/partnerships; and, the Company’s ability to manage its projects effectively and to mitigate the potential lack of availability of contractors, budget and timing overruns and project resources. For additional risk factors, please see section titled “Risks Factors” in the Company’s most recently filed Annual Information Form (“AIF”) available on SEDAR at www.sedar.com and EDGAR at www.sec.gov/edgar.

There can be no assurances that forward-looking information and statements will prove to be accurate, as many factors and future events, both known and unknown could cause actual results, performance or achievements to vary or differ materially from the results, performance or achievements that are or may be expressed or implied by such forward-looking statements contained herein or incorporated by reference. Accordingly, all such factors should be considered carefully when making decisions with respect to Centerra, and prospective investors should not place undue reliance on forward-looking information. Forward-looking information is as of November 4, 2022. Centerra assumes no obligation to update or revise forward-looking information to reflect changes in assumptions, changes in circumstances or any other events affecting such forward-looking information, except as required by applicable law.

Use of Non-GAAP and Other Specified Financial Measures

This presentation contains “specified financial measures” within the meaning of National Instrument 52-112 *Non-GAAP and Other Financial Measures Disclosure* of the Canadian Securities Administrators. None of these specified financial measures is a standardized financial measure under International Financial Reporting Standards (“IFRS”) and these measures might not be comparable to similar financial measures disclosed by other issuers. Accordingly, these specified financial measures should not be considered in isolation, or as a substitute for, analysis of the Company’s recognized measures presented in accordance with IFRS.

The following non-GAAP financial measures are used in this presentation:

- *All-in sustaining costs (“AISC”) on a by-product basis* is a non-GAAP financial measure calculated as the aggregate of production costs as recorded in the consolidated statements of earnings, refining and transport costs, the cash component of capitalized stripping and sustaining capital expenditures, lease payments related to sustaining assets, corporate general and administrative expenses, accretion expenses, asset retirement depletion expenses, copper and silver revenue and the associated impact of hedges of by-product sales revenue (added in the current period and applied retrospectively to the previous period). When calculating all-in sustaining costs on a by-product basis, all revenue received from the sale of copper from the Mount Milligan Mine, as reduced by the effect of the copper stream, is treated as a reduction of costs incurred. All-in sustaining costs on a by-product basis for the Kumtor Mine excludes revenue-based taxes.
- *Free cash flow (deficit) (“FCF”) from mine operations* is a non-GAAP financial measure calculated as cash provided by mine operations less property, plant and equipment additions. Management uses this measure to monitor the degree of self-funding of each of its operating mines and facilities.
- *Adjusted net (loss) earnings from continuing operations* is a non-GAAP financial measure calculated by adjusting net earnings from continuing operations as recorded in the consolidated statements of earnings and comprehensive income for items not associated with continuing operations. This measure adjusts for the impact of items not associated with continuing operations. Management uses this measure to monitor and plan for the operating performance of continuing operations of the Company in conjunction with other data prepared in accordance with IFRS.
- *Adjusted net (loss) earnings* is a non-GAAP financial measure calculated by adjusting net earnings as recorded in the consolidated statements of earnings and comprehensive income for items not associated with ongoing operations. The Company believes that this generally accepted industry measure allows the evaluation of the results of continuing income-generating capabilities and is useful in making comparisons between periods. This measure adjusts for the impact of items not associated with ongoing operations. Management uses this measure to monitor and plan for the operating performance of the Company in conjunction with other data prepared in accordance with IFRS.

The following non-GAAP ratios are used in this presentation:

- *AISC on a by-product basis per ounce* is a non-GAAP ratio calculated as all-in sustaining costs on a by-product basis divided by ounces of gold sold. Management uses this measure to monitor the cost management effectiveness of each of its operating mines.
- *All-in costs on a by-product basis per ounce* is a non-GAAP ratio calculated as all-in costs on a by-product basis divided by ounces sold. Management uses this measure to monitor the cost management effectiveness of each of its operating mines.
- *Adjusted net (loss) earnings from continuing operations per share*, is a non-GAAP ratio calculated as adjusted net earnings from continuing operations divided by shares outstanding. Management uses this measure to monitor and plan for the operating performance of the Company in conjunction with other data prepared in accordance with IFRS.
- *Adjusted net (loss) earnings per share*, is a non-GAAP ratio calculated as adjusted net earnings divided by shares outstanding. Management uses this measure to monitor and plan for the operating performance of the Company in conjunction with other data prepared in accordance with IFRS.

Additional information about these measures, including explanations of their composition, explanations of how these measures provide useful information to investors and quantitative reconciliations to the most directly comparable financial measures in the Company’s unaudited financial statements for the quarters ended September 30, 2022 and 2021, is included in the section titled “*Non-GAAP and Other Financial Measures*” of the Q3 2022 MD&A, which section is incorporated by reference herein. The Q3 2022 MD&A is available under the Company’s profile on SEDAR at www.sedar.com.

Centerra's Short-term Strategy

Complete additions to the Öksüt ADR plant, obtain all regulatory approvals to re-start operations.

Continue to optimize operations and exploration at the Mount Milligan Mine.

Advance the Goldfield Project with an initial resource estimate mid-2023 and a Feasibility Study thereafter.

Update view of the Molybdenum Business Unit.

Build a stable and strong platform for future growth.

Corporate Highlights

✓	<p><u>Öksüt Mine Operations Update</u></p> <ul style="list-style-type: none"> Processing activities including active leaching and operation of the absorption, desorption and recovery (“ADR”) plant has been suspended since August 2022; mining, crushing and stacking activities continue. Application for the Environmental Impact Assessment (“EIA”) was submitted at the end of August with final submission planned for year-end 2022. The EIA public hearing was held on November 1, 2022. Mercury abatement retrofit to the ADR Plant on schedule for construction completion by year-end.
✓	Announced closing of global arrangement agreement with Kyrgyzaltyn and the Kyrgyz Republic on July 29, 2022, resulting in the cancellation of all shares held by Kyrgyzaltyn (77M) and a 26% reduction in Centerra’s total outstanding shares (from approx. 297M to 220M shares).
✓	Announced highlights from new life of mine (“LOM”) plan for the Mount Milligan Mine October 4, 2022. Mine life extended by over four years to 2033. Increase in the proven and probable reserves of 1.1 million contained ounces of gold and 260 million contained pounds of copper ⁽¹⁾ .
✓	Announced Normal-Course Issuer Bid (“NCIB”) and received stock exchange approval to purchase for cancellation up to ~15.6M common shares (~7% of Centerra’s total issued and outstanding Common Shares) in October 2022.
✓	Advancement of the Goldfield Project continues; initial resource estimate targeted by mid-2023 with a feasibility study thereafter.
✓	Appointed Paul Wright Centerra’s Interim President and Chief Executive Officer and Paul Chawrun as Chief Operating Officer on September 6, 2022.
✓	Maintained quarterly dividend of CAD\$0.07 per share in Q3 2022.

(1) CIM definitions were followed for the classification of Mineral Reserves. Please see the NI 43-101 Technical Report published Nov 7, 2022 for more details and refer to the QP statements on pg. 15 of this presentation.

ESG Highlights

Achieved one million hours without a lost time injury at the Öksüt Mine in third quarter 2022.

Published Centerra’s Environmental, Social, and Governance (“ESG”) Report and Conflict-Free Gold Report.

Continued focus on safety leadership training/awareness.

Progressed activities towards achieving conformance with the Responsible Gold Mining Principles (“RGMPs”) by year-end.

On International Women’s Day 2022, signed a cooperation agreement in Develi (local to the Öksüt Mine) for the start of a Local Marketplace for Women Producers. The market was officially opened on September 14, 2022.

Completed a global diversity, equity and inclusion survey and created the formation of a committee focused on the rollout of a Global IDEA Strategy and action plan for the remainder of 2022 and 2023.

Operational Highlights Q3 2022

Mount Milligan Mine Operating Highlights

- Quarterly gold production costs of \$729/oz; all-in sustaining costs on a by-product basis⁽¹⁾ of \$615/oz.
- 2022 guidance remains unchanged:
 - Copper production on-track for 70-80M lbs.
 - Trending towards the lower-end of gold production guidance range of 190-210koz.
- Staged flotation reactors commissioned as of May 2022, improving gold and copper recoveries.
- Technical Report is being filed on November 7, 2022; on-going optimization of operations.
- Approximately 50,000 metres of diamond drilling completed in 2022 since January 1, 2022.

Mount Milligan Operating Summary	Q1 2022	Q2 2022	Q3 2022
Total Material Mined (Tonnes 000s)	10,651	11,602	11,924
Ore Mined (Tonnes 000s)	4,992	4,556	5,294
Ore Processed (Tonnes 000s)	5,251	5,055	5,538
Cu Head Grade (%)	0.23%	0.20%	0.20%
Cu Recovery (%)	81.9%	83.7%	82.4%
Cu Produced (000 lbs) ⁽²⁾	20,558	17,352	19,045
Au Head Grade (g/t Au)	0.35	0.39	0.47
Au Recovery (%)	67.9%	68.8%	66.2%
Au Produced (oz) ⁽²⁾	39,093	42,728	54,134

(1) Non-GAAP financial measures. See the "Non-GAAP and Other Financial Measures" section of the Company's Q3'22 MD&A (refer to pp. 40-46)

(2) Mount Milligan production is presented on a 100%-basis. Under the Mount Milligan Streaming Arrangement, Royal Gold is entitled to 35% of gold ounces and 18.75% of copper. Royal Gold pays \$435 per ounce of gold delivered and 15% of the spot price per metric tonne of copper delivered.

Öksüt Mine Operating Highlights

Öksüt Mine Operations Update

- Gold room operations at the Öksüt Mine's ADR plant and active leaching remain suspended; mining, crushing and stacking activities continue.
 - Progress in advancing the EIA remains in accordance with plan, including the public consultation meeting held November 1, 2022.
 - Mercury abatement retrofit to the ADR Plant on schedule for construction completion in December 2022 (total cost ~\$5M).
-
- Pursuit of other ordinary course permits on-going.
-
- As at September 30, 2022, ore processed into stored gold-in-carbon form is over 100,000 recoverable ounces.

Öksüt Operating Summary	Q1 2022	Q2 2022	Q3 2022
Tonnes of Ore Stacked (000s)	963	1,046	1,015
Heap Leach Grade (g/t)	1.59	1.90	1.96
Heap Leach Contained Ounces Stacked	49,111	63,860	63,834
Gold Ounces Produced	54,691	-	-
Additions to stored gold-in-carbon inventory (oz) ⁽¹⁾	-	58,469	~45,000

(1) Represents a subset of the recoverable ounces in the ADR inventory as at June 30, 2022 and September 30, 2022, respectively.

2022 Production Guidance

Gold Production

Copper Production

Mount Milligan 2022 LOM Highlights

- Mine life extended by over four years; extended open pit mining and milling operations to 2033.
- Proven and probable gold reserves increased by 1.1M contained ounces and copper reserves increased by 260M contained pounds⁽¹⁾.
- Net Cash Flow⁽³⁾ ~\$640M using a gold price of \$1,500/oz and copper price of \$3.25/lb; and
- Net Cash Flow⁽³⁾ ~\$1.0B at prices of \$1,700/oz of gold and \$3.50/lb of copper.
- Total CAPEX of ~\$494M (inclusive of TSF capitalization) assumes investment in and replacement of a portion of the heavy-duty mobile fleet.
- Significant exploration potential exists for new areas of mineralization.

NPV of \$486M
 5% Discount Rate
 \$1,500/oz Gold / \$3.25/lb Copper

NPV of \$797M
 5% Discount Rate
 \$1,700/oz Gold / \$3.50/lb Copper

Updated Proven and Probable Mineral Reserves⁽¹⁾

(1) CIM definitions were followed for the classification of Mineral Reserves. Please see the NI 43-101 Technical Report published Nov 7, 2022 for more details and refer to the QP statements on pg. 15 of this presentation.
 (2) Non-GAAP financial measures. See the “Non-GAAP and Other Financial Measures” section of the Company’s Q3’22 MD&A (refer to pp.40-46).
 (3) Net Cash Flow is defined as cash provided by operating activities less cash used in investing activities and lease payments. Net Cash Flow includes cash flow estimates for the year of 2022 of \$75 million (life of mine) and \$117 million (sensitivity), calculated using the above commodity price assumptions for the full year. The 2022 cash flow estimates will differ from the actual results for the year due to differences in actual prices, costs, foreign exchange rates, and production metrics and estimates.

Financial Highlights Q3 2022

Financial Results

<i>(in millions, except ounces and per share amounts)</i>	Q3 2022	YTD 2022
Revenues	\$179.0	\$641.9
Gold ounces sold	56,245	192,750
Total copper pounds sold (000s)	19,647	58,019
Cash (used in) provided by operating activities	\$(17.0)	\$7.8
Free cash flow deficit from continuing operations ⁽¹⁾	\$(35.5)	\$(57.6)
Net (loss) earnings	\$(33.9)	\$52.9
Adjusted net (loss) earnings ⁽¹⁾	\$(15.9)	\$4.3
Net (loss) earnings per share ⁽²⁾ , basic	\$(0.14)	\$0.19
Adjusted net (loss) earnings per share ^(1,2) , basic	\$(0.06)	\$0.02
Gold production costs (\$/oz)	\$729/oz	\$653/oz
All-in sustaining costs on a by-product basis ⁽¹⁾ (\$/oz)	\$941/oz	\$826/oz

(1) Non-GAAP financial measures and ratios and supplementary financial measures. See the “Non-GAAP and Other Financial Measures” section of the Company’s Q3’22 MD&A (refer to pp. 40-46).

(2) As at September 30, 2022, the Company had 220,086,775 common shares issued and outstanding.

Financial Highlights

<ul style="list-style-type: none"> Cash used in operating activities by continuing operations of (\$17M) and free cash flow deficit⁽¹⁾ from continuing operations of (\$35.5M) At the Mount Milligan Mine, cash provided by mine operations of \$33M and free cash flow from mine operations⁽¹⁾ of \$21M offset the cash used in mine operations of (\$18M) and free cash flow deficit from mine operations⁽¹⁾ of (\$23M) at the Öksüt Mine.
<ul style="list-style-type: none"> The Company remains on track for 2022 copper production guidance and cost guidance and is trending towards the lower-end of the gold production guidance range.
<ul style="list-style-type: none"> NCIB and stock exchange approvals announced in October. NCIB initiated in consideration to current market valuation and to increase shareholder returns.
<ul style="list-style-type: none"> Stored gold-in-carbon inventory balance at the Öksüt Mine ~100,000 recoverable ounces⁽²⁾, as at September 30, 2022 with a recorded cost of \$45M.
<ul style="list-style-type: none"> Continue to implement a new streamlined business plan for the Langeloth Facility: <ul style="list-style-type: none"> Reduce annual operating costs, inventories and overall working capital with the goal of generating free cash flow from operations. Cash inflow of \$7M during Q3'22.
<ul style="list-style-type: none"> Quarterly dividend declared of C\$0.07 per common share.

Gold Production & Gold-in-Carbon (Koz) QoQ

Liquidity (\$M)⁽³⁾

(1) Non-GAAP financial measures and ratios. "Non-GAAP and Other Financial Measures" section of the Company's Q3'22 MD&A (refer to pp. 40-46)
 (2) Represents a portion of the recoverable ounces in the ADR inventory as at September 30, 2022. Additions to stored gold-in-carbon inventory in Q3'22 is ~40-45Koz – totals in bar chart are approximate, using gold-in-carbon form inventory noted within Q3'22 MD&A (refer to pp 2&14).
 (3) As at September 30, 2022. Total liquidity is calculated as 'Cash and cash equivalents' and amount available under the Corporate Credit Facility.

Disclosure - NI 43-101 Technical Report & Qualified Persons

NI 43-101 Technical Report

The LOM is included in a new technical report filed on November 7, 2022 (the "2022 Mount Milligan Technical Report"). The 2022 Mount Milligan Technical Report includes revisions to the resource model, metallurgical recoveries, capital and operating cost estimates, NSR cut-off value, and the LOM open pit design. The technical report is prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101") and is filed on SEDAR and EDGAR with an effective date of December 31, 2021.

Qualified Persons & QA/QC :

The scientific and technical information contained in this presentation relating to mineral reserve estimates of the Mount Milligan Mine is based on, and fairly represents, information compiled by Gordon Zurowski, P.Eng who is a member of the Professional Engineers Ontario. Mr. Zurowski is independent within the meaning of Canadian Securities Administrator's NI-43-101, as a full-time employee of AGP Mining Consultants, Inc. and not Centerra. Mr. Zurowski has sufficient experience which is relevant to the style of mineralization and type of deposit under consideration and to the activity which he is undertaking to qualify as a "Qualified Person" under NI 43-101. Mr. Zurowski has consented to the inclusion in this presentation of the mineral reserve estimates based on his compiled information in the form and context in which it appears in this presentation.

The scientific and technical information contained in this presentation relating to the Mount Milligan Mine's mineral resource estimates is based on, and fairly represents, information compiled by Brian Thomas, P.Eng who is a member of the Professional Geoscientists of Ontario. Mr. Thomas is independent within the meaning of NI 43-101, as a full-time employee of WSP Global Inc. and not Centerra. Mr. Thomas has sufficient experience which is relevant to the style of mineralization and type of deposit under consideration and to the activity which he is undertaking to qualify as a "Qualified Person" under NI 43-101. Mr. Thomas has consented to the inclusion in this presentation of the mineral resource estimates based on his compiled information in the form and context in which it appears in this presentation.

All mineral reserve and resources have been estimated in accordance with the standards of the Canadian Institute of Mining, Metallurgy and Petroleum and NI 43-101.

All other scientific and technical information presented in this document, including the production estimates, were prepared in accordance with the standards of the Canadian Institute of Mining, Metallurgy and Petroleum and NI 43-101 and reviewed, verified, and compiled by Centerra's geological and mining staff under the supervision of W. Paul Chawrun, Professional Engineer, member of the Professional Engineers of Ontario (PEO) and Centerra's Vice President and Chief Operating Officer and Anna Malevich, Professional Engineer, member of the Professional Engineers of Ontario (PEO) and Centerra's Senior Director, Projects, each of whom is a "Qualified Person" for the purposes of NI 43-101. Sample preparation, analytical techniques, laboratories used and quality assurance and quality control protocols are done consistent with industry standards and independent certified assay labs are used.
